# About **Silver Metcop**

Silver Metcop is one of the leading companies that deal in Copper Cathodes, Copper Rods, and Copper scraps. Because we value quality, we never compromise the quality of our products. We offer one of the best products to our customers. For us, client satisfaction is vital. We can even supply our products throughout India because of our customer-focused business practices. We have a group of experts who are trained in the copper industry.

Even we have a customer service team. They assist our consumers in finding an immediate and suitable solution to their problems. So, with the help of our team, we can reach a global audience.

## **Our Mission**

We strive to achieve the highest level of client satisfaction by offering the best selection of products and services. We provide top-notch assistance with the supply chain, customer service, and quality control techniques.

## **Our Vision**

With the help of our staff, we are constantly confident in the quality of our product. For both the wholesale and commission trades, we strive to be India's top wholesaler. Our ambition will soon come true, even with the high quality of the products.

# Why Choose Us

## Best Quality

High conductivity copper is very readily worked, both hot and cold. ETP copper contains a minimum of 99.90% copper, with oxygen being the principal secondary element.

## Best Price

We offer the most competitive prices. Simply knowing your needs are all that's necessary. We offer a selection of high-quality items at competitive pricing.

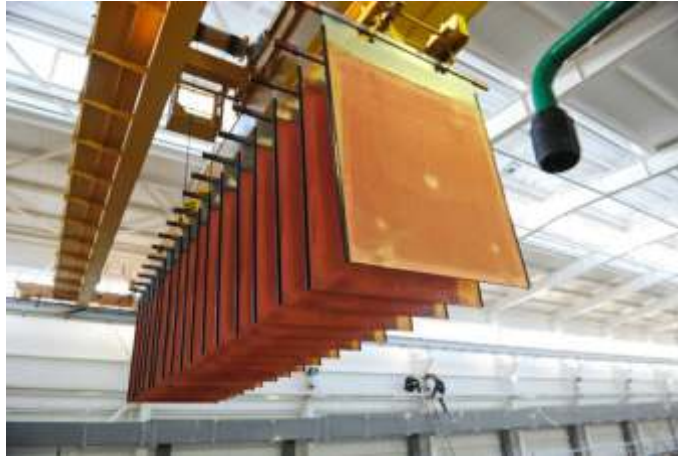

## Fast Service

We offer a variety of product qualities. As a result, we can supply the goods as soon as possible, with the best quality, and in the quantity that you require.

# Our Products

## Copper cathod

Silver Metcop are delivered Quality Copper Cathodes. Offering a large selection of Pure Copper cathodes, we aim to satisfy the ever-changing needs of our customers. Continuous cast copper rods utilize in the manufacture of wire, cables, and transformers, which are produced using copper cathodes. In the form of metals and sheets, they are used in the production of copper tubes for consumer durables and other purposes.

Copper cathode Grade A Purity: purity 99.97%-99.99% min Specifications. Available at competitive & reliable prices with excellent customer service and outstanding delivery reliability.

# Our Products

## Copper rod

We provide copper rods with the assurance of strength, and superior quality. Our products receive high praise for their durability, high strength, and excellent finish. We sustained a large stock of Copper Rods. Copper rod is a kind of non-ferrous metal processing rod, which has good processing performance.

According to worldwide quality testing standards, these high-performance copper rods have completed quality testing. The rod's conductivity is good. We select our products with client needs in mind and stick to industry standards.

# Our Products

## Copper scrap

Silver Metcop provides Copper scrap. In addition to being a flexible, robust, and corrosive environment, the metal has proven to be a very effective conductor of heat and electricity. Copper is among the most valuable metals available when it comes to scrap collection and recycling. Copper is used and recycled indefinitely since it is recyclable. Our scrap can use to create high-quality products because it is made of high-purity copper and hasn't been tainted by other metals.

So, our team is here to deliver one of the best quality copper scraps. Just give us a call and drop your requirement on our mail id.
